

With the New Meal Patterns that go into effect October 1, 2017, we know it can be hard to determine which food products are #cacfpcreditable. We aim to work with manufacturers to offer an online database of creditable products. Stay tuned as we develop this resource for the entire CACFP Community including providers, centers, Head Start, afterschool meal programs, sponsors, purchasing agents and manufacturers.

All foods are subject to the individual infant and their own developmental readiness to consume that food item.

Important

- 1. Breastmilk or formula, or portions of both, must be served; however, it is recommended that breastmilk be served in place of formula from birth through 11 months. For some breastfed infants who regularly consume less than the minimum amount of breastmilk per feeding, a serving of less than the minimum amount of breastmilk may be offered, with additional breastmilk offered at a later time if the infant will consume more.
- 2. Infant formula and dry infant cereal must be iron-fortified.
- 3. Beginning October 1, 2019, ounce equivalents are used to determine the quantity of creditable grains.
- 4. A serving of grains must be whole grain-rich, enriched meal, or enriched flour.
- 5. Breakfast cereals must contain no more than 6 grams of sugar per dry ounce (no more than 21.2 grams sucrose and other sugars per 100 grams of dry cereal).
- 6. Fruit and vegetable juices must not be served.
