

## **SOLICITATION FOR PRESENTATIONS**

-----

### **EMERGING ENERGY STORAGE TECHNOLOGY**

NAATBatt International, the trade association for advanced battery manufacturers, component suppliers and users in North America, invites proposals from owners of new battery and energy storage-related technologies to present at NAATBatt's 2018 Annual Meeting & Conference in San Antonio, Texas on Thursday, March 22, 2018. Companies selected to present will be invited to make a short, "flash" presentation to the meeting about a new, market-ready technology that is available to NAATBatt members for immediate license or purchase.

The NAATBatt membership includes some of the largest and most successful advanced battery companies in the world. The purpose of these "flash" presentations is to give NAATBatt members a first look at new technologies that may be useful in their businesses. These presentations provide developers of new advanced battery technologies with an opportunity to have their technology seen, and possibly purchased or licensed, by a major industry player.

Proposals to present must be no more than three (3) pages in length. Applicants will be vetted by a committee of NAATBatt International member firms, which will invite 10 applicants to present at the meeting. Presenting firms will have exactly five (5) minutes to describe their technology and make the case for its sale or license.

Companies interested in presenting at the Summit should submit an abstract (3 pages max.) by e-mail to [jgreenberger@naatbatt.org](mailto:jgreenberger@naatbatt.org) on or before **December 31, 2017**. Selected companies will be notified by late January 2018.

There is no charge for selected companies to present at the meeting. Representatives from selected companies desiring to attend the balance of the NAATBatt 2018 Annual Meeting will be offered sharply discounted registration. Display tables in the exhibit area are available for purchase.
