For lamp shade options choose from 11 different images shown on the other side

Art Shade Design Options

*shades are printed
on backlit media
and faced on both
sides with clear
vinyl for durability*

**Lamp shade designs from
Mary Louise Ravese's
Enigma Series of
photographs.**

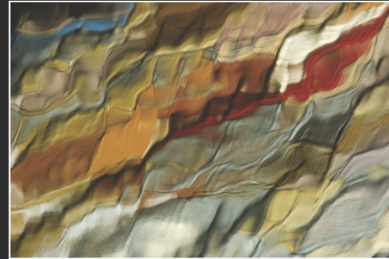

The "Enigma" series are photographs of light from a stained glass window reflected in an empty hammered brass bowl in a Gothic cathedral in Normandy, France. As I moved around the bowl, different sections of the window would be reflected, resulting in the different colors and patterns in each image. Made using a macro lens, each image captures the beautiful reflections in a small section of the bowl only a few inches in size.
