Preceptor Orientation and Training

Orientation for student clinical and field experience rotations refers to a **high-level overview** of student oversight and evaluation and is required only for the liaison or key contact at each clinical and EMS field agency where students are assigned.

Training for the capstone field internship provides more **in-depth information** on coaching, monitoring attainment of competencies, evaluating student performance, and shaping professional behavior.

	ORIENTATION		TRAINING
	Liaison or Key Clinical Contacts	Liaison or Key Field Experience Contacts	Capstone Field Internship Preceptors
Includes the following topics: <ul style="list-style-type: none"> Purposes of the student rotation (minimum competencies, skills, and behaviors) Evaluation tools used by the program Evaluation criteria of for grading students Contact information for the program Program's definition of Team Lead Program's required minimum number of Team Leads Coaching and mentorship techniques 	X	X	X
