

CoAEMSP Program Director Survey Results

Conducted October 2020

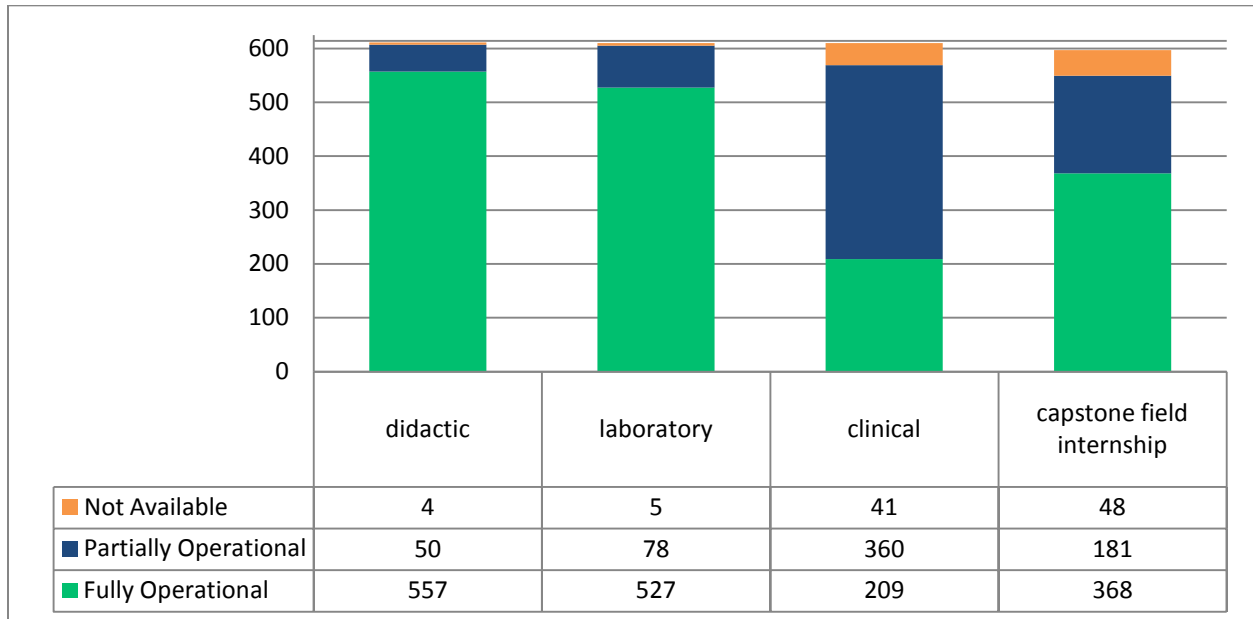

In October, CoAEMSP conducted a survey with program directors of CAAHEP accredited and CoAEMSP LoR programs to learn the status of Paramedic programs across the nation and in the Kingdom of Saudi Arabia. A healthy response rate of 91% of programs responded, for which CoAEMSP is grateful. This information helps inform CoAEMSP and other EMS stakeholders of the landscape of Paramedic educational programs.

Is your Paramedic program functioning?

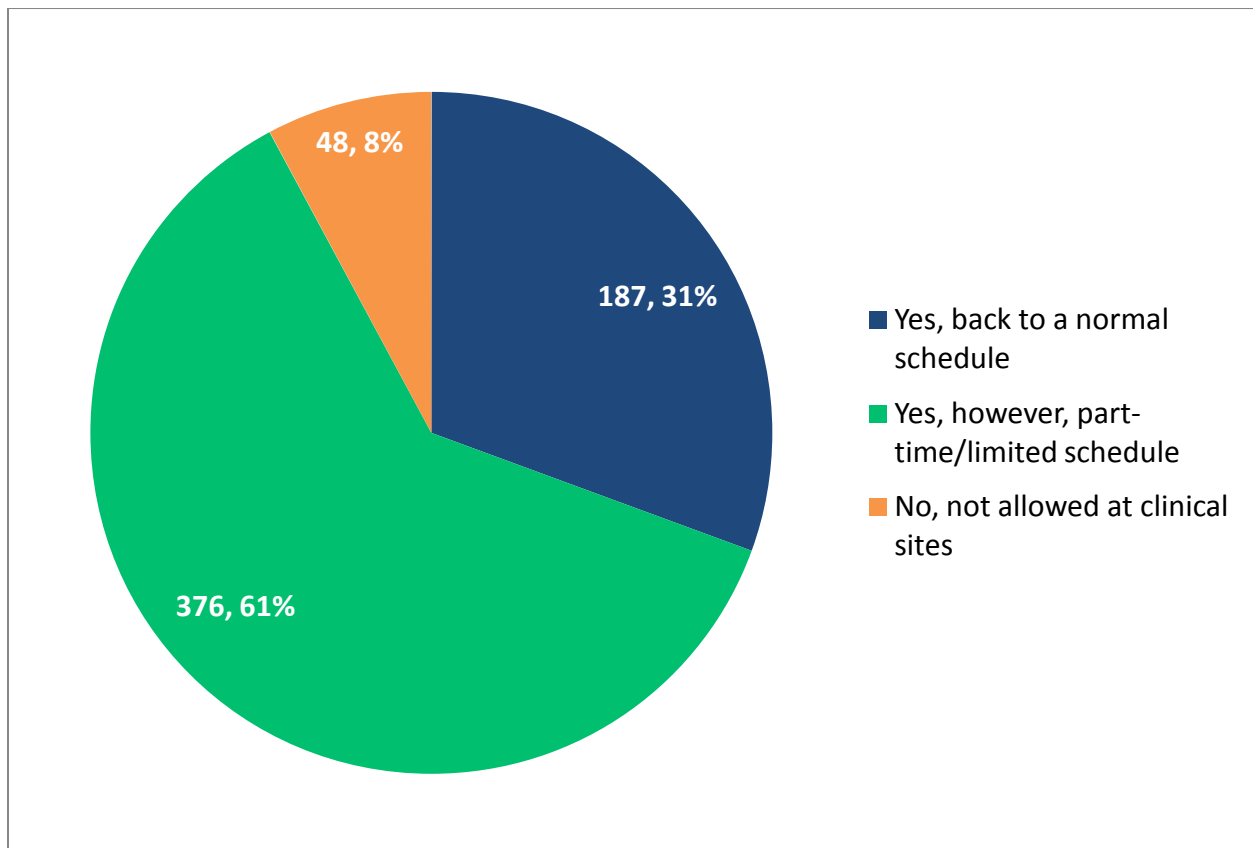

Note: The question did not accommodate those programs that may be closed, but not due to COVID-19. The program was forced to select either or; therefore, the number of programs closed due to COVID-19 may be less.

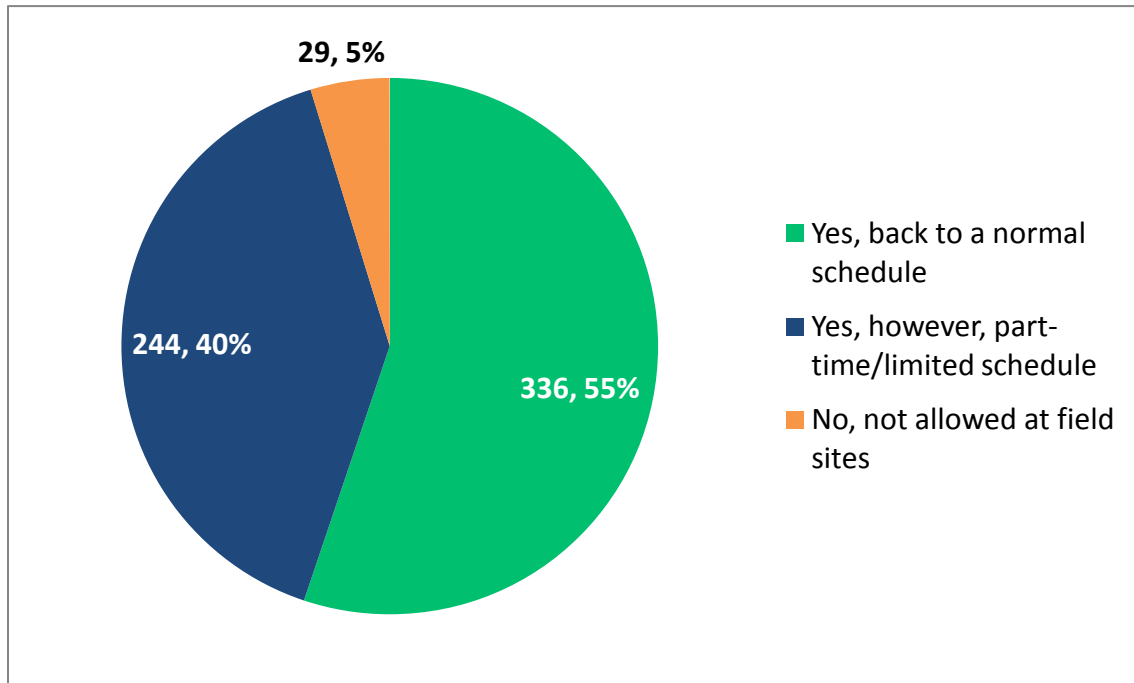

Select the components that are active within your Paramedic program

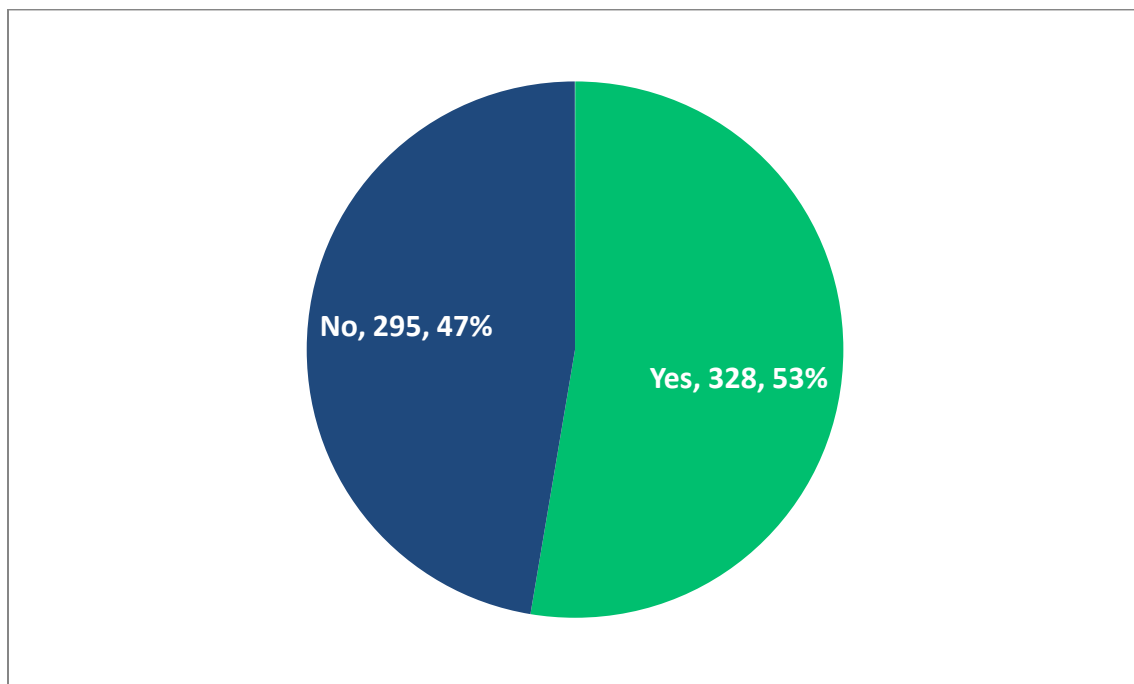

At this time, are your students permitted to resume their clinical education in an assigned clinical affiliate?

At this time, are your students permitted to resume their capstone field internship at an assigned field site?

Are there limitations on your next cohort?

Who is mandating the limitations of your next cohort?
