A new setting has been added that allows you to turn alerts on or off. When notifications are turned off the Alerts button in the left side toolbar will be hidden.

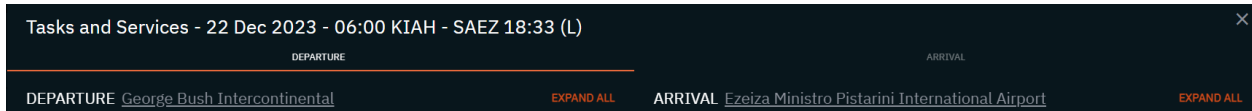

Within the Trip Builder, as legs are created you will now receive a warning when a crewmember is already scheduled for another leg or activity. Additionally, an internal trip number, up to 10 characters, may be added at the top of the Trip Builder window.

## 2. Tasks and Services Enhancements

Several improvements have been made to the Tasks and Services feature within Calendar Exchange and Timeline Manager.

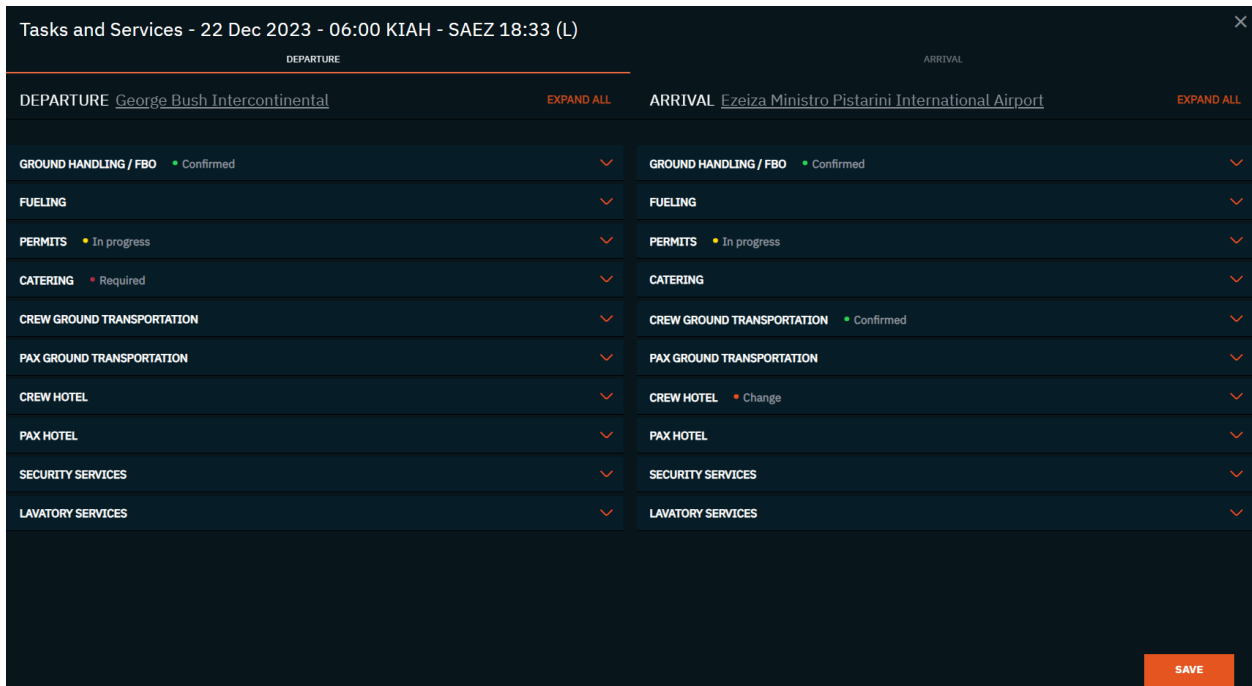

Departure and Arrival leg details are now displayed at the top of the Tasks and Services window. Selecting the Airport name hyperlink will take you to the airport details for the selected airport.
