NORTHAMPTON COMMUNITY COLLEGE

OCCUPATIONAL SAFETY & HEALTH

NCC's Occupational Safety & Health programs provide the essential skills necessary to control hazardous and environmental exposures in the workplace and to prevent worker illness and injuries. The programs are ideal for aspiring safety professionals or individuals assigned to provide safety and health compliance within their organization. Concept electives will prepare participants for either a general industry or construction workplace safety role. Convenient, 100% online format enables participants to complete a program as a full time student or part-time while working.

Participants in NCC's Occupational Safety and Health program, will learn to:

- Develop and implement occupational safety and health programs and procedures within organizations to reduce or eliminate workplace exposures to risks and hazards.
- Conduct workplace inspections to identify and mitigate areas that are not in compliance with Federal or Commonwealth laws and regulations.
- Design and deliver occupational safety and health training programs.
- Advise senior leadership on methods to achieve higher worker productivity with reduced expenses and litigation, reduction of absenteeism, and positive workforce morale through the implementation of cost-effective workplace safety programs.

Occupational Safety & Health Career Paths

Overall employment of occupational health and safety specialists and technicians is projected to grow 13 percent from 2022 to 2032, much faster than the average for all occupations. About 17,200 openings for occupational health and safety specialists and technicians are projected each year, on average, over the decade (BLS.gov).
