OCTOBER 6, 2017

Science

This term we have kicked off our year long study of biomes with the Arctic biome. Students have learned some of the features and behaviors for plants and animals to survive in these cold, harsh conditions.

We are setting the stage for weather studies with a review of topics like the water cycle, clouds, and heat transfer. Look for a quiz coming up the week after next.

See the grasshopper?

6th Grade Envision Math

The girls have done a great job tackling their new curriculum. The curriculum moves into advanced concepts quickly and involves much application, but they are working through the explanations as they are presented in multiple ways.

**Lesson explanations are available at PearsonRealize.com. The girls each have their own

Science in the outdoor classroom

Nature Scavenger Hunt

The Nature Scavenger Hunt is nearly due! The family project, launched in the spring, should be turned in by October 20th. If you need just a few more plants or animals from our own biome, you may want to visit The Ecotarium in Worcester or Tower Hill Botanic Garden in Boylston, MA.

If you have any questions, please feel free to email Mrs. Cleveland at: ncleveland@holdenchristianacademy.org

A lesson on the burden of unforgiveness during Spiritual Emphasis Week
