Science 3 & 4 Last week we started our Trout Brook field trips!

The students are excited about this hands on learning opportunity that enhances our life cycle curriculum this term. We are proudly hatching something in Mrs. Jorritsma's classroom; we are not sure what, but we are thinking they are frogs! What an excellent way to jump into spring, by collecting, observing, and ultimately learning about the pond habitat and lifecycles. We are grateful to all the parents who take time out of their busy schedule to chaperone these field trips! Thank You! On the following dates we are in need of chaperones/ drivers: May 9, May 16, May 23 and May 30th. Please help out if you can. This does count as service hours!

LA Grades 3 and 4 and History Integrated. Once again the students were able to perform a play for Grades 1 and 2 along with our special guests, Mrs. Lucier, Mrs. Hayward, and Mrs. Jonay. The play was about Betsy Ross and the first flag which was commissioned by General George Washington. Did you know that Betsy was able to add her own suggestions such as the shape of our American Flag? How about the fact that our stars were almost like the British, with 6 points? Nope! Thanks to Betsy and her friends our first American flag was rectangular with 13 5- pointed stars evenly spaced in a circle to give all thirteen colonies equal standing.
