### Plimoth Preview Day

As you know, our students have been very busy this fall! On October 10th, the middle school put on a Plimoth preview for the younger students. They each studied an Early American Plimoth resident, created a model of their house, and told all about their person for grades K-4. They did a fantastic job displaying homes that looked authentic. The students were both informative and interesting in the facts they chose to share as well. The next day, Teams A and B visited Plimoth Plantation with a wealth of information and some great questions!

### We had a whale of a time!

Our whaling field trip was fantastic! Students got to see life-size examples (like the whale heart on the right), real artifacts of things like scrimshaw, and a half-size whaling ship! They also learned how the Cape was formed, how erosion continues to shape the Cape, and that salt marshes eat shoes! The Whydah Pirate Museum was fascinating, and the water park was the best! Ask your student for details!
