FEB. 13, 2020

We cannot believe that it is already Term 3! February break is in sight!

Grades 3 and 4 will be learning about immigration throughout February. There will be a much bigger focus on our genealogy research and compiling our own book. During February vacation, there will be assignments for you to all work on as a family together. Keep an eye out for your child's folder; it will contain more information. Please remember that the genealogy packets will be due on February 24th and will be counted as a grade.

Throughout February we will be having lots of fun learning about magnetism in science; this is always such an exciting unit!

In Grade 3, our focus in Food for Life will be on "Eating the Rainbow" and Plant Protection. In Grade 4, we will be learning about nutrition and cooking as well as soil, seeds, worms and soil. How are they all connected? Well, we will be conducting some experiments to find out!
