# CLOSE-UP ON EPIGENETICS

This session provides a foundational understanding of how historical and intergenerational trauma affects family experiences and interactions with systems. Participants will explore the impact of these experiences on trust, communication, and responses to system involvement. The session encourages reflection on practice and policy to strengthen relationships with families and support trust-centered approaches. By the end, participants will understand epigenetic trauma and its significance in fostering compassionate and collaborative work with children and families.

**8:30 - 9am – Visit resource tables and enjoy continental breakfast**

**9am – Training begins**
