ABOUT OHIO START

Ohio Sobriety Treatment and Reducing Trauma (START) is a children-services-led initiative that has been shown, when implemented with fidelity, to improve outcomes for both parents and children affected by child maltreatment and parental substance use disorders. The model uses a variety of strategies to promote collaboration and systems-level change within and between child welfare agencies, substance use and mental health treatment providers, the judicial system, and other family-serving entities. The overall goal of this model is to stabilize families harmed by parental drug use so that both children and their parents can recover and move forward with abuse-free and addiction-free lives.

Ohio START is administered by Public Children Services Association of Ohio (PCSAO).
