

Viking/Pfaff Software Workshop

March 25th 2pm-4pm \$15

Teacher: Rita Gomez

Most stores only teach the most current software version. We would like to help those with any version of the Husqvarna/Viking or Pfaff software. Of course, your computer must be up-to-date.

Many of us find it difficult to use our software, even though we take monthly classes. While many of the lessons are helpful, it is sometimes hard to remember how to perform simple tasks and we may need a little individual help.

Here's the class for you OR someone you know that has the same problem.

The workshop will run 2 hours and the cost will be \$15.00. You will not be the only person in the class, so please bring your list of questions, and call the store in advance to sign up!!

Supplies needed:

Laptop: with Ultra Premiere software installed

MOUSE: (you will not be able to follow class without it)

Glasses: to see the screen, if needed
