WHY DONORS SHOULD CARE

LGBTQ+ youth are significantly more likely to seriously consider, attempt, and complete suicide than their peers. This community is also more likely to experience homelessness, food insecurity, bullying, violence, and discrimination. LGBTQ+ youth do not experience greater risks inherent to their identity, but rather due to deep-seated societal discrimination and bias. IOYS is dedicated to reducing these risks by actively seeking social change to increase understanding and acceptance of gender and sexual diversity.

MAJOR GOALS

for the next 3-5 years

1

Expand our services
to better serve both young
adults (ages 19-24) and
youth (ages 13-18).

2

Build our health advocacy so that
LGBTQ+ youth are affirmed and
supported no matter where they
are and what they need.

3

Decrease high rates of
discrimination, suicide risk,
risk of violence, and
homelessness in the LGBTQ+
youth community.
