

## **Rent Community Cue: “Seasons of Love”**

Join us for a deep dialogue into themes presented in the musical RENT. The dialogue will center around the history of the AIDS epidemic, the awareness of those living and thriving today despite the virus. We'll examine the stigma placed on LGBTQ+ community historically within families, faith communities and society at large. Another thread highlighted in RENT is the lack of affordable housing and community displacement for segments of the population and how this still affects our city today. Resources and organizations will be made available for those wanting to connect with others and learn how to engage to become the change one longs to see in the world.
