

We want to hear from you!

Join the conversation on coastal resilience for transportation and navigation.

To improve resilience to coastal flooding, NOAA is seeking to better understand product and information needs of the transportation community. We want to hear what you need to support your community. In addition, attendees will learn about

several existing NOAA products for reducing coastal hazards and planning for resilience. Your participation will help NOAA's National Ocean Service improve data, tools, and services to build coastal resilience at longer time horizons.

NOAA Listening Session: Shaping the Future of Coastal Flooding Tools for Long-Term Decision-Making

Please share this opportunity with other transportation and navigation professionals in your network so that their needs can inform the future of coastal flooding tools.

When: January 25, 2022, 2 to 4 p.m. (Eastern)

Host: NOAA's Center for Operational Oceanographic Products and Services and NOAA's Office for Coastal Management

Seating is limited. Reserve your space by registering here:
