

District 3A Continued:

Everyone was satisfied with the topic and the speakers, so I would consider that a success. We learned microplastics is an ongoing threat but each of us can do small changes and together we can have a positive impact on making a cleaner environment

Many clubs finished the year with the traditional Green, sales centerpiece, designs, wreaths, and other holiday decorations. Several clubs also worked with youth, teaching them how to create centerpieces, holiday mugs, and crafts.

Michigan Garden Clubs continues to be community leaders, providing leadership, education, and promoting environmental protection. Hope everyone had a lovely & gratifying holiday season.
