

## District 2B Continued:

Garden clubs in the district are getting ready for summer garden tours. Meridan typically plans two or three sites to visit. Lansing will have one day of two or three gardens to visit with lunch to follow. In addition, they plan other day tours or a lavender tour.

Each club is getting teams ready to look after their gardens in the community. This beautification in each community adds charm, education and beauty to the community. Gardens create that much needed green space in urban areas. In addition, many clubs are also gearing up for summer plant sales. These are fundraisers for the club's operations.
