

Medix4Life Products contain the proprietary Regulatory Protein-based nanoparticles that are created utilizing Nanotechnology and unavailable as part of any other product in the world market today.

A unique quality of these nanoparticles is their bioactivity in Ultra Low Doses (ULD). Just 1 gm (0.035 oz.) of this active ingredient is sufficient to produce 60 million full strength doses.

These nanoparticles are structured with the Regulatory Protein core, surrounded by lipids and carbohydrates, providing stability and protection from the destructive influence of various enzymes, including digestive enzymes of the gastrointestinal tract. Once introduced into the body, these active nanoparticles easily pass through the intestinal wall, enter the bloodstream and are carried to the tissues or organs for which they were formulated. Upon reaching a targeted organ or tissue, these nanoparticles mimic the body's natural processes, reestablishing optimal communication between the existing cells and activated Adult Stem Cells to support rapid conversion and replacement of the damaged cells.

**We proudly present our
Medix4Life Line of Products!**

Manufactured by PROTOMEDIX

Product List

ADR Medix	(ML-23) Adrenal
BLDR Medix	(ML-26) Bladder
SC Medix	(ML-27) Blood Sugar
BRST Medix	(ML-21) Breast
ONC Medix	(ML-18) Cellular Degeneration & Apoptosis
CNSE Medix	(ML-09) Brain & Central Nervous System
CNT Medix	(ML-01) Connective Tissue
ENDO Medix	(ML-70) Endocrine Balance-Male & Female
FEM Medix	(ML-14) Female Reproductive System
GB Medix	(ML-20) Gallbladder
HRT Medix	(ML-12) Heart & Cardiovascular
HYP Medix	(ML-24) Hypothalamus
OptiWeight	(ML-60) Hypothalamus & Hunger
IMN Medix	(ML-04) Immune System
THYM Medix	(ML-03) Thymus Gland & Immune System
LGI Medix	(ML-22) Intestinal Tract & Digestion
KDN Medix	(ML-08) Kidney & Detoxification
LVR Medix	(ML-05) Liver & Detoxification
LNG Medix	(ML-17) Lung/Bronchi
PANC Medix	(ML-07) Pancreas & Digestion
CNSN Medix	(ML-10) Peripheral Nervous System
PIN Medix	(ML-28) Pineal Gland
PIT Medix	(ML-25) Pituitary
PROS Medix	(ML-16) Prostate
OST Medix	(ML-15) Skeletal/Bone
SPL Medix	(ML-06) Spleen & Immune System
THYR Medix	(ML-19) Thyroid
BLD Medix	(ML-02) Vascular, Oxygenation, Immune

These products contain Regulatory Proteins obtained from natural sources using Nanotechnology which supports cellular communication and activation of Adult Stem Cells. They are a basic natural component and are active in Ultra Low Doses (ULD). They do not cause any adverse reactions, do not have side effects and are hypoallergenic by their very nature.

These are not intended to diagnose, treat, cure or prevent any disease, only to support the body's natural processes. These statements have not been evaluated by the FDA.

ADULT STEM CELL ACTIVATION

Results like never before!

It has been long known that no matter the original cause, lifestyle excesses, environmental toxicity, disease, etc., all body tissue breakdown first begins at a cellular level. The ability to control the cellular regeneration within damaged tissues is increasingly becoming an important focus for many researchers worldwide. **Medix4Life** scientists pioneered the field over 30 years ago, publishing the first article in 1976.

Our scientists have established that, in response to cellular damage, certain Regulatory Proteins are secreted by the cells of various body tissues, to activate the Adult Stem Cells, the body's natural healing resource. However, it is a very slow process, even under the best of circumstances. If the cellular trauma is severe enough, this very mechanism of cell regeneration gets so weakened that it doesn't work fast enough or even work at all in a worst case scenario.

As a result of over 30 years of research, **Medix4Life** scientists have developed Regulatory Protein-based Nanoparticles for use as active ingredients in all of our products specifically formulated for Health Practitioners! These unique Nanoparticles help to re-establish and enhance communication signals between individual cells. They activate the Adult Stem Cell conversion process that naturally facilitates tissue repair and the restoration of normal cellular function within targeted organs.

Since regular exercise and proper nutrition are key factors in restoring and maintaining health, **Medix4Life** products work best when integrated into a complete wellness program. **Medix4Life** products will enhance any health program for better and faster results.

Benefits

- Supports Fast Recovery from Injury and Surgery
- Supports Reduced Scar Tissue Formation
- Supports Cardiovascular Performance
- Supports A Healthy Immune Defense System
- Supports a Healthy Immune Response
- Supports Healthy Metabolism and Detoxification
- Supports a Healthy Blood Sugar Level
- Supports Healthy Brain Function and Mental State
- Supports Healthy Neurological Function
- Aids in Weight Management and Fat Metabolism
- Supports Endocrine Hormone Balance
- Supports Healthy Digestion and Absorption
- Supports Energy, Endurance and Resilience
- Supports a Healthy Oxygen Supply to Organs
- Supports Sharp Concentration and Memory
- Supports Healthy Organ Function
- Supports the Health of the Skeletal System
- Supports a Healthy Vascular System
- Supports Recovery of Overexerted Organs & Tissues
- And So Much More...

Activate Your Own Adult Stem Cells & Support the Natural Repair Process of Your Body

www.kogardens.com

Science

Our bodies are made of combinations of amino acids, the building blocks of life. These amino acids combine into chains to form Proteins, out of which countless number of cells of all body tissues and organs are made.

All cells interact with each other with a system of control signals, passed from one cell to another or through the bloodstream. Once cells receive this information, they "know" what to do. All biological processes, whether genetic transcription, repair, regeneration, cellular division, metabolism, even cellular death, are strictly controlled by these Regulatory Signals. This process is known as Regulatory Transduction. If these signals are not "heard" by the cells or they pass through distorted, cells lose their functional purpose, leading to chaos in the processes that maintain cellular metabolism, propagation and organ function balance. The consequence of such cellular malfunction is a development of degenerative processes in the body tissues, accelerated aging, formation of autonomous growths and so much more...

As it happens, our bodies already have a built-in source for cellular regeneration called Adult Stem Cells. These cells are best viewed as a renewable cellular reserve, which can be activated in order to replace damaged cells and repair tissue. Adult Stem Cells are present in all tissues of the human body from the moment of birth and their primary role in a living organism is to maintain and repair the tissues and organs in which they are located.
