

Erik Kampmann – Design Coordinator

Erik Kampmann is responsible for transforming our clients' visions into buildable home plans. A seasoned design professional, Erik has mastered the lost art of *listening*. New clients are often pleasantly surprised by how quickly Erik completes plan revisions that reflect exactly what they were looking for. His creativity enhances the client's ideas, but never overwhelms them. Erik's understanding of construction processes helps him create designs that we can build efficiently, respecting the client's budget objectives every step of the way.

With almost 30 years of experience and a wealth of projects nationally and in the Virgin Islands, Erik has won awards for his designs. His wide spectrum of projects includes housing revitalization for the U.S. Military, commercial airport facilities, home additions and complete home makeovers, and, of course, high-end custom homes...his true passion.

Erik has been coming to the beach since he was big enough to skim board and his family established the Dairy Queen in Dewey Beach – where he spent a lot of summers slaving away making Blizzards. Erik settled in Ocean View, with his wife Karen and daughter Melanie, 7 years ago and absolutely loves his work at Turnstone.

Fun Fact: Die-hard NY Yankees fan

Previous Life: Lead singer of thrash metal band, Dead by Dawn
