Where is the faucet?

Ooooh, that faucet!!

PROJECT OVERVIEW POWDER BATH

“MODERN INDUSTRIAL”

Ooooh, that faucet!

Highlighting this very unique, tall, curved, chrome faucet was critical. This was achieved by adding texture in the background tile with the Ballistic Armor backsplash and taking it all the way up the 10ft ceiling flanking the tall mirror. A standard sink was not going to cut it in this space, so a custom concrete floating sink was designed with an angled side drain to balance the shape and size of the tall faucet. The thick front edge adds some visual weight to attach the floating rift oak cabinetry on. Undercabinet lighting highlights the floating detail, and pin lights highlight the faucet and textured backsplash. A wall mount toilet was used for space saving and to keep within the floating theme in the space.
