

Petaluma Watershed Collaborative: Working Towards a Healthy Watershed

COMMUNITY INPUT VALUED!

The Petaluma Watershed Collaborative is working in the Petaluma River watershed to restore and protect the watershed for the community and natural resources alike, beginning with two main planning actions — the updating of the *Petaluma Watershed Enhancement Plan* and creation of the *Petaluma Watershed Action Plan*.

These planning efforts focus on ways in which stakeholders can work collaboratively to identify watershed needs, as well as opportunities to protect, conserve, restore, and enhance the natural resources of the watershed for both community and ecological benefit.

Gaining insights and opinions from community members, landowners, and local stakeholders to utilize throughout the planning process of both Plans is key to our success!

How you can be involved:

- Watch the [short video presentation](#) outlining Petaluma Collaborative efforts and goals for Plan development, or visit the [Petaluma Watershed page](#) on the Sonoma RCD website for more information
- [Provide input](#) to be explored in the update of the [Petaluma Watershed Enhancement Plan](#)
- [Submit projects](#) to be evaluated for inclusion in the Top 10 Projects List for the first Petaluma Watershed Action Plan
