

FIELD WORKSHOP: WILDFIRE RESILIENCE FOR COMMUNITIES IN EAST SONOMA COUNTY

SATURDAY, MARCH 8TH

SANTA ROSA, CA

9AM-4:30PM

You are invited to join Cal Poly's Fuels and Vegetation Education Program for a field-based training in the central Mayacamas Mountains. The program will begin in Santa Rosa and we will visit Saddle Mountain, Monan's Rill, and Pepperwood Preserve.

This workshop is an opportunity to learn about fuels management and wildfire resilience through the work of local communities within the Mayacamas Range. Presenters will showcase efforts in post-fire conditions, including prescribed burning, shaded-fuel breaks, and grazing treatments.
