

THE NEW AND IMPROVED ALPHASTAFF EMPLOYEE PORTAL

The new AlphaStaff Portal is here! This next generation of HR technology will provide you greater ability to maintain your employees, while providing a fresh new look for your employees and managers to enjoy.

- A streamlined employee portal optimized for mobile phones.
- Powerful new reporting features, enabling you to run payroll and access the information you need in seconds.
- Robust, flexible security capabilities through role-based permissions

AND MUCH MORE!

Better User Experience for Employees

Employees benefit from an employee portal designed to work across smartphones, tablets, laptops, and desktops. With these changes, your employees will have greater flexibility to access and update their own personal information.

Role-based Permissions and Improved Manager Experience

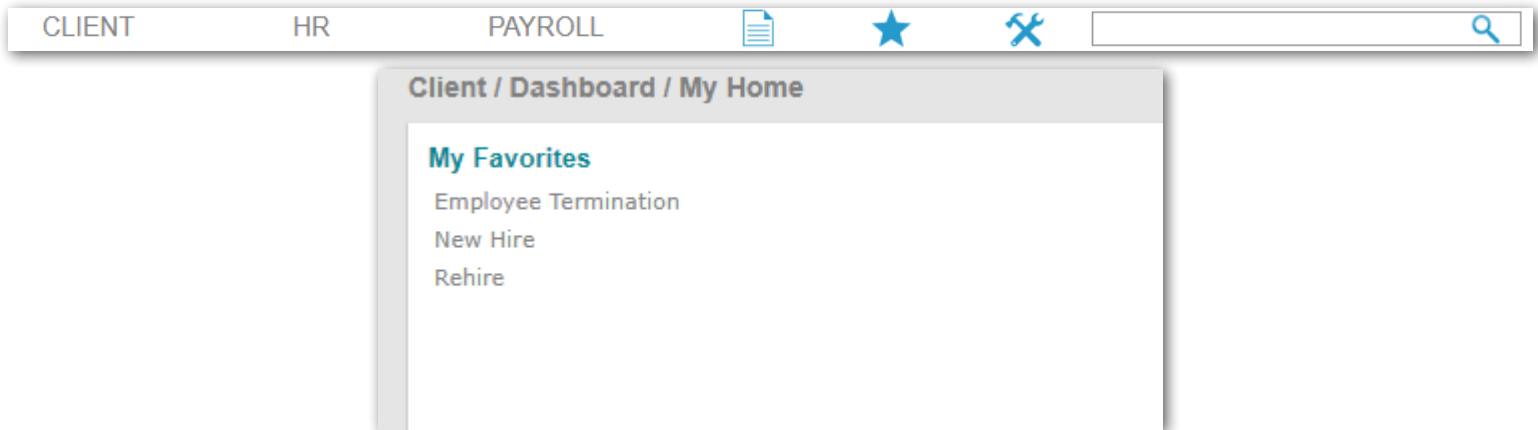

This new platform provides enhanced security capabilities, controlling access to specific fields, menus and data. You can use roles to control access for groups or individuals so they only see what they need, when they need to see it.

THE NEW AND IMPROVED ALPHASTAFF EMPLOYEE PORTAL

Quickly Find What You Need, With Improved Search

New search capabilities make it extremely easy for managers to find almost anything, by typing in just a few characters into the search box. With our favoriting feature, simply save your most frequent menus so you can access them directly upon logging into your dashboard every day.

Reporting

The AlphaStaff portal provides numerous pre-built reports with a wide range of customizable parameters, making it easier than ever to find the information you need. Reports are generated in real-time and immediately available.

With our Data Retriever feature, Managers can quickly access and report on employee data whenever they want. Additionally, Managers can save templated employee reports, making it easy to quickly access the same data the next time it's needed.
