

## Phone Access for Schoology using the app

1. Once they download the app to their phone they need to search for Nease (see fig. 1)
2. Then they need to select the “Nease High School” with the **GREEN** dot next to it. (See fig. 2) Then they will log in using their active directory information (username and password). If they don’t know their username and password, you can pull it up for them in eSchool in TAC Reports. I don’t have access to those reports, so I cannot pull it up that info. ☹
