

JOURNEY DATA PACKAGE™ MAGNET® VERSION

Data and outcomes are critical drivers in a successful Magnet® journey. Organizations need structures and processes in place to support the robust data collection Magnet® requires. The collection of data alone is not enough; comprehensive structures and processes that support clinical nurse ownership of data must also be operationalized. Our Cultures of Excellence consultants are experts in the requirements for success. The Journey Data Package includes four days of consulting time provided in the following deliverables:

Journey Data Workshop

This one-day workshop focuses on the data requirements for a successful Magnet® designation. Time is spent working with inpatient, peri-operative, and ambulatory groups to ensure the required NSI data (patient satisfaction, clinical indicators, and RN satisfaction) are being collected, and to brainstorm potential NSI data to collect in the ambulatory areas.

Data Drill Down

The Magnet® data requirements and associated reporting options are complex and require a comprehensive drill down of all data sets. A CHCM data expert will spend two days with you evaluating your NSIs, patient satisfaction, and RN satisfaction data by category, specific question, comparison group, mean, and median to identify the best light in which to portray your organization's data.

Virtual Mentoring

The nature of data requires that it is reviewed in regular intervals, and there will always be questions that arise. Our virtual mentoring process can save you hours of time trying to address data-specific issues you are unsure of.

Let us help you be successful!
