# How to manually check for updates on your Surface 3

- Type "updates" in the search bar
- Click on "Check for updates."

- Follow the directions to download and install updates
- Check in periodically to make sure process is happening
- This will involve one or more restarts

Windows Update

Make sure to restart properly!

- Tap the Windows icon ⊞ then the power icon ⏻
- Choose "Restart"

This is the way you should restart the Surface every single night. Restarting properly one or more times a day will ensure that your Updates are downloading and installing automatically.
