

NEW!

MAJOR REAL TIME API INTEGRATION

STARTING APRIL 1

*REFER TO BOTTOM IF USING SNAG OR TALENT REEF

 **Efficient Hire.** → **iSolved** →  **Altametrics**

INTEGRATION BENEFITS AND COST SAVINGS:

- 01** The current EF to iSolved integration can take up to an hour to appear in iSolved. The new API will be almost in real time.
- 02** Photos, PDF's, and scanned documents can be directly sent into iSolved and tagged to employee. This includes drivers licenses, I-9 documents, W4's, and new hire onboarding information.
- 03** Changes or updates, such as handbook resigning, status changes, etc., can be directed into iSolved.
- 04** Better resolution of rehires to iSolved.
- 05** Data will be pushed into Altametrics - saving managers from having to hire employees in Onboarding and Altametrics.
- 06** Payroll changes, such as rate, can go directly to Altametrics.
- 07** Bonus benefit: No SSN mismatches from Onboarding to iSolved to Altametrics.
- 08** Includes dashboard that shows you the status of integration, and error alerts. This will give you a chance to resolve and resubmit files.

ALTAMETRICS INTEGRATION: ONLY \$30/MONTH PER LOCATION
(ABOUT THE COST OF 1 HOUR OF MANAGER TIME!)

PHASE 2

Integration directly with Altametrics for payroll information (occurring at the end of April). We will obtain data faster, while picking up CA Meal Penalties and other pay all in one file. By using the API, we can cut out many of the import/exports.

For those using Snag or Talent Reef for Onboarding:

As you may be aware, we are able to push data automatically into iSolved, and now Altametrics. The limitations are in that you need to get the vendor to send us files every 5 minutes; they only send us very basic data (enough for payroll), and they do not send any PDF's.

Note: We also offer a service for mass uploading documents through our API from previous payroll companies, onboarding systems, certifications, etc.
