

REGROUNDING OUR RESPONSE: STAGES OF CHANGE AND HARM REDUCTION

Led by Jess Nesbitt and Anastasia Edmonston

The link between substance use disorders and brain injury is well-established; people with substance use disorders are at risk of sustaining a brain injury and people who have a brain injury are at risk of developing a substance use disorder. What is addiction? How does intentional behavior change happen? How can we best support people who use drugs or alcohol from a person-centered approach? This webinar will involve a discussion about stigma, behavior change, act as an introduction to harm reduction, and equip you with some best practices for supporting people who use substances."
