

LETTER FROM AUSTRALIA

G'Day Alan from Australia,

I read with interest your report below. Like just about everyone on the planet you have dissected the report that Al Gore pushed without testing the true science. This is not a criticism of you. However you did include a comment that it is all about changing the world economic system. That is the truth. The modification of the world climate has been used as a blind and carrier for the basic socialist changes being forced on us.

The Paris agreement is all about socialism and economic change which has been hidden within the proposed legislation. The final aim as stated by this world wide socialist movement is to “kick God off the face of the Earth” - Satan’s last stand ?????

The truth about the alteration in the weather that is happening world-wide is :-

It is obvious to any observer that we do have climate modification, but it IS NOT CAUSED BY CARBON DIOXIDE !!!!

The main cause is the increase in EARTH TILT.

I am a retired research scientist who spent over 60 years in scientific research. One area of my work was in monitoring seismic and micro seismic activity world-wide. The facts are :

- *The earthquake in Indonesia in 2004 caused the Earth tilt to increase. Such geological events usually take up to 10 years to show effects of that event.*
- *The latter earthquake in Japan increased that tilt, as did another in Chile.*
- *These seismic events changed the north and south tilt of the earth which cause the seasonal changes, resulting in the land that was previously without sunshine in winter has been increased by about 110 km of land, and likewise in summer about an extra 110 km of land received additional sunshine in the summer months. This effect is evident in both hemispheres and has dramatically changed the thermodynamics on the Earth's surface. Positive proof of this is that the Inuit Indians living in North Canada, who navigate by the stars when moving about especially over vast areas of snow and ice, have asked the Canadian, American and British Governments and NASA "Why has the sky changed?"*
- *You and I both know that the sky does not move, but the tilt of the Earth put the stars, galaxies and planets in a different location relative to the "sky overhead". Thus proof of 'earth tilt change'.*
- *The fact that the permafrost areas around the North Pole have melted, cannot be caused by atmospheric content of carbon dioxide as claimed. It must have come from beneath the existing ice covering as that covering must be completely removed before any atmospheric thermal effects melt the permafrost. The truth is that there are and still are 5 thermal vents in the earth's crust in this area and they have been blowing out super-heated steam at 780 degrees Celsius for at least 25-20 years --- thus heating the permafrost land. No carbon dioxide increase there!!!*

- *The change in the Earth's tilt also changed the rotational speed of both the Earth's molten core and Crust. Thus putting greater stress on the interface between the crust and the core resulting in more earthquakes and volcanic activity which has been evident over the past decade.*
- *If the documents of the Paris meeting are read fully, they include a section where Group 1 of the countries will be forced to fund changes in Group 3 countries. Australia is in Group 1 and China is in Group 3 ---- so Australia will have to borrow billions of dollars from China and repay that loan at interest, and hand over the borrowed money to China as a gift. Now that is GREATIVE ACCOUNTING !!! If a country does not comply with this condition, they have already agreed to hand over government of their country to the United Nations . Don't hear about that do we ???*
- *This is all part of a global scheme to create a one world socialist government.*
- *So no matter what we do, we cannot change back the changes in the weather, until another series of seismic events change the thermodynamics of the Earth's surface in the opposite direction that we are living through now.*

May I suggest and point out that many of the alarmist statements about climate conditions being the worst ever, have not been challenged by truth and are basically wrong. Viscous attacks result directed to anyone who questions the validity of these "stories".

So what is truth :-

The hottest day on record in Australia was in 1828 not 2019.

Back before man-made climate change was frying Australia, when CO₂ was around 300ppm, the continent savoured an ideal pre-industrial climate. Right?

This is the kind of climate we are spending \$10bn per annum to get back to. Right again?

We are told today's climate has more records and more extremes than times gone by, but the few records we have from the early 1800s are eye-popping.

Things were not just hotter, but so wildly hot it burst thermometers.

The earliest temperature records we have show that Australia was a land of shocking heatwaves and droughts, except for when it was bitterly cold or raging in flood. In other words, nothing has changed, except possibly things might not be quite so hot now!

Lance Pidgeon has been researching records from early explorers and from newspapers. What he's uncovered is fascinating. It's as if history is being erased!

For all that we hear about recent record-breaking climate extremes, records that are equally extreme, and sometimes even more so, are ignored. In January 1896 a savage blast like a furnace stretched across Australia from east to west and lasted for weeks. The death toll reached 437 people in the eastern states.

Newspaper reports showed that in Bourke the heat approached 120°F (48.9°C) on three days.

Links to documentary evidence (1- <https://trove.nla.gov.au/newspaper/article/33121679?zoomLevel=4>) (2 - <https://trove.nla.gov.au/newspaper/article/14033806?zoomLevel=6>) (3 - <https://trove.nla.gov.au/newspaper/article/53682260?zoomLevel=6>) The maximum at or above 102 degrees F (38.9°C) for 24 days straight.

Use the several links below to read the news reports at the time for yourself.

- 1. By Tuesday January 14, people were reported falling dead in the streets - <https://trove.nla.gov.au/newspaper/article/44132389?zoomLevel=5>*
- 2. Unable to sleep, people in Brewarrina walked the streets at night for hours, thermometers recorded 109F at midnight - <https://trove.nla.gov.au/newspaper/article/44159099?zoomLevel=5>*
- 3. Overnight, the temperature did not fall below 103°F.*
- 4. On Jan 18 in Wilcannia, five deaths were recorded in one day, the hospitals were overcrowded and reports said that more deaths are hourly expected - <https://trove.nla.gov.au/newspaper/article/14033576?zoomLevel=5>*
- 5. By January 24, in Bourke, many businesses had shut down(almost everything bar the hotels) - <https://trove.nla.gov.au/newspaper/article/75263800>*
- 6. Panic stricken Australians were hills in climate refugee trains - <https://trove.nla.gov.au/newspaper/article/8888573?zoomLevel=6>*

As reported at the time, the government felt the situation was so serious that to save lives and ease the suffering of its citizens they added cheaper train services.

What I found most interesting about this was the skill, dedication and length of meteorological data taken in the 1800s. When our climate is the most important moral challenge. Why is it there is so little interest in our longest and oldest data?

Who knew that one of the most meticulous and detailed temperature records in the world from the 1800s comes from Adelaide, largely thanks to Sir Charles Todd.

The West Terrace site in Adelaide was one of the best in the world at the time, and provides accurate historic temperatures from Australia's first permanent weather bureau at Adelaide in 1856.

Rainfall records even appear to go as far back as 1839. Lance Pidgeon went delving into the National Archives and was surprised at what he found.

The media are in overdrive, making out that the extreme heat is the new normal in Australia. You can't blame those high records on man-made global warming!

Well Alan, I hope that your second report looks at all truthful evidence rather than discuss the totally incorrect statements being propagated now as a blind to establish world socialism.

May God guide and bless you as you continue to give all praise, worship and credit to God the Father – God the Son Jesus – and God's Holy Spirit.
