

## Dear Parent/Guardian

Generation Alive is excited to partner together with the students and families of Shaw Middle School.

Generation Alive is a Spokane County-based non-profit that is activating youth to lead with compassion. GA works with schools, and other youth-serving organizations to increase awareness of needs in the community and provide youth with tangible ways to make a lasting impact. Please take a look at our website, [www.generationalive.org](http://www.generationalive.org) to learn more about us.

Statistics show that approximately 65,000 people suffer from food insecurity in Spokane County. We recently presented to the students of Shaw Middle School and encouraged them that they could do something to help with this issue. Our **Something to Eat** program provides students with an excellent opportunity to look outside themselves and help someone in need right here in our own community.

At our recent presentation, we gave your student a donation box. We challenged each student to try and fill the box with as much change as possible over the 3 weeks. Even if it seems small, every cent will help provide local food banks with much needed food. One quarter provides one nutritious meal for a person in need here in Spokane County. For a little added incentive, we offer a pizza party from Pizza Pipeline for the advisory class that raises the most money. The money raised provides the supplies to pack meals at the Something to Eat food-packing event, which will take place on March 24th.

You can also donate online at [www.generationalive.org/s2e](http://www.generationalive.org/s2e) Simply pick your students' school name and follow the instructions. We look forward to this day and watching all of your student's hard work come to fruition as they get to pack the meals.

Thank you,
