

What are the ballot questions?

Question 1: Right to Repair

YES vote

Provides independent auto repair shops access to mechanical data that vehicle manufacturers and dealerships currently only have access to. As a result, individuals may get their cars repaired at independent auto repair shops, as opposed to depending on the vehicle manufacturer.

NO vote

Continues the current system under which independent auto repair shops do not have access to such data. Only vehicle manufacturers and dealerships will continue to have access to it.

What are the ballot questions?

Question 2: Ranked Choice Voting (RCV)

YES vote

Implements a new voting system in which voters rank candidates. The first candidate to attain majority support (50% + 1) wins. RCV is only employed in elections with more than two candidates. Candidates with minimum support are eliminated until one candidate attains majority support.

NO vote

Keeps our current voting system in place, in which whoever has the most votes wins. A majority of votes is not necessary. This is also called a "first past the post" system.
