

CDC CHILDREN'S GARDEN IS THRIVING!

Thanks to Saint Mark disciple Becky Oliver and the contributions of other church members and community businesses, the CDC Children's Garden was established earlier this year on the northeast side of the CDC grounds. It hasn't taken long for the peppers, squash, tomatoes, bush beans, and marigolds (to name a few) to flourish under the care of Becky and her young gardeners.

As fall approaches, the gardeners are planning their new crop and will happily accept donations if you would like to help their effort. Stay tuned as we follow their progress!
