Your Solutions Partner

Equipment rental solutions

Safety Express provides rental solutions for projects both large and small. We are your one-stop-shop for drying equipment, air scrubbers, carpet extractors, surface preparation equipment and much more.

By their very nature, storms and wild fires are unpredictable. As a contractor, you respond with the right equipment to the unique conditions created by each event. One of the first issues you are faced with is the decision to buy or rent your equipment. When faced with this decision, there are factors to consider:

1. **Optimize your cash flow.** Mobilizing your team and waiting to get paid following a significant weather event can put strain on your cash flow. Perhaps renting your incremental equipment make sense.

2. **Long term storage.** Equipment storage can take up valuable space in your facility. If you only need additional equipment to support CAT response or a localized weather event, perhaps renting make sense.

We are here to respond when you do. Our trailers are stocked and our after-hours service will ensure you can always connect with our team when you need us. (800) 465-3898

If renting equipment is the solution for your business, make Safety Express your first call.
