

Methamphetamine decontamination. *Equipping you for success!*

Methamphetamine use in Canada is still a growing concern and it creates a need for trained professionals to decontaminate laboratories and user sites. Education and appropriate decontamination products are key to your success when offering Methamphetamine decontamination services.

Apple Environmental Meth Remover is a formulated aqueous alkaline solution aiding in the decontamination process for the physical removal of methamphetamine contamination. Whether the property is contaminated through meth production or use, this specially developed detergent used with standard practices enhances the decontamination process. The meth lab and meth use epidemic is spreading across the United States and Canada contaminating thousands, if not hundreds of thousands of homes. Let us help create a healthy living environment once again. Contact us today to find out more about our product, Apple Environmental Meth Remover, and the processes we have used to successfully decontamination hundreds of homes.
