Bradford Becken, MD

Dr. Becken has received numerous compliments on the student ev als. He has been recognized for his enjoyable lectures and humor. One student even commented that they are considering Infectious Diseases. Thank you, Dr. Becken, for your commitment to our students!

Matthew Dennis, MD

Dr. Dennis is such an asset to CHHC patients. He took the time to visit a mom while her child was in the PICU (he was not on service but took time out of clinic to see them). He offered peace and realistic expectations and shared a moment with mom that she described as “heaven sent.” This gesture made in their time of crisis was very impactful and memorable for them.
