

# Explore POOL/PACT's eLearning System

## ***Created Especially for POOL/PACT Members***

**POOL/PACT's online courses are designed to help you and others in your entity manage risks.**

### **Relevant**

What you won't find in the POOL/PACT eLearning portal is a library of over 120 generic safety topics irrelevant to your operations. The courses offered have been developed specifically for our members to respond to the most commonly requested training materials. Course content is tailored to local government operations in Nevada; not "one size fits all" private-sector corporate training that fails to address statutory requirements found only in the public sector.

### **Engaging**

POOL/PACT offers a wide range of online safety training courses for members looking to keep their employees safe and productive. These courses offer all the content and quality of our traditional classroom training programs, without the travel expense and time. Some of the courses incorporate a blended learning model to engage the learner more effectively. POOL/PACT makes it easy and enjoyable to learn our technically sound content through a well integrated learning experience comprised of video, animation, interactive user exercises and real-world simulations.

### **Efficient**

Online learning provides an easy way for POOL/PACT members to deliver training to employees. Users have expressed positive feedback regarding the ability to take courses on their own schedule, in their preferred location (at home or at their entity), and at their own pace.

All POOL/PACT members have access to a range of online courses at no cost - making them one of the most cost-efficient training vehicles available!
