Key findings show I-1631 would:

- **Impose a new \$30 billion energy tax** that would be collected from Washington Consumers over 15 years
- **Cost an average Washington household \$440/year** in 2020, rising to \$990 within 15 years
- **Leave 93% of Washington's greenhouse gas emissions untouched** - *Fail to significantly reduce Washington's greenhouse gas emissions*

*Analysis of Economic and CO2 Emissions Impacts of Washington Initiative 1631,
NERA Economic Consulting, October 2018
