

Biography

Hayley J. Bieker

Hayley J. Bieker, CCS is the owner of Full Code CDI™ and founder of the EverNorth CDI Academy Method™. She founded both company and products with the vision to provide individuals with an opportunity to pursue a secondary education at reasonable costs. It is Ms. Bieker's opinion that there are many people, if given an affordable opportunity, will act on that opportunity and move beyond to achieve great things. She would like to help facilitate this happening within her own CCS/CDI community.

Ms. Bieker's coding experience spans a wide breadth of specialties including E.R, Critical Care, OBV, Physician E&M, Surgical CPT, Facility as well as Adult and Pediatric Inpatient Coding. Her career began the same time Clinical Documentation Improvement Programs were taking off. Thus, she took advantage of every opportunity presented to her to not only learn this specialty but capitalize on it; thus molding it to fit within the coder's scope of proficiency.

Most recently, Ms. Bieker has been a pioneer by leading the charge to marry the Inpatient Coder role to that of the role of the Clinical Documentation Specialist. Thus creating a new career tract for experienced Inpatient Coders; The Coder/Clinical Documentation Specialist. With this vast knowledge and expertise, she has founded and developed the EverNorth CDI Method™. This proprietary and innovative Coder/CDI method is the core curriculum taught in the EverNorth Online CDI Academy™. This program will distinguish itself from all competitors by training Inpatient Coders to perform CDI tasks in-house or remotely. In addition, Ms. Bieker continues to contribute her vast skill set as a consultant for Coding and CDI projects for many of the nation's hospitals adding continuous real world experience to her resume'.
