Over the past several years, Dr. David Campt has developed the [White Ally Toolkit Workshop](#) to teach allies how to foster constructive debiasing dialogues with the racism skeptics within their spheres of influence. As Dr. Campt explains:

“If anti-racism allies are going to change any minds, empathetic listening will likely be important. But, the anti-racism movement should not expect [people of color (POC)] to empathetically listen to white racism skeptics. White people are in a much better position to execute listening-based strategy with people who are skeptical about whether racism is real. On a daily basis, POCs must endure the indirect expression of white skepticism that racism really matters, and they must do so as they are experiencing overt and subtle racism in many parts of their lives. Some people of color might choose to have conversations where white people’s racial skepticism is consciously expressed. But it would not be fair and just to *expect* people of color to endure this.”
