

Encompassing Health

ENHANCING BENEFITS, ENRICHING LIVES

A preventive health and disease management program that does not disrupt or replace current insurance offerings. Focusing on promoting health, before it becomes a health insurance issue.

“Encompassing Health was implemented in February 2021 through auto enrollment. This process was extremely smooth and allowed us to immediately start savings payroll taxes as well as give our employees a streamline access to preventative healthcare program.”

- Joshua,

Office Manager of a
Large Franchise Company
