New Scholarship program available to help students earn a credential in high-growth job fields

Harper College has partnered with Google to provide scholarships for students to complete Google’s Professional Certificates Program on Coursera. This online, self-paced program allows students and staff to obtain world-class, industry-recognized skills training that can help prepare learners for high-growth in-demand jobs.

About the Program

• Each certificate can be completed in under 6 months with approximately 5-10 hrs of course work per week
• Courses are a mix of hands-on labs and other interactive assessments. All developed by Google employees.
• Certificate completers receive a credential recognized by industry experts
• No previous experience or post-secondary degrees required to enroll

Certificate Programs Available

Google’s Professional Certificates on Coursera offer an ideal way to provide world-class, industry-recognized skills training that can help enhance hireability for high-growth jobs. Full scholarships are available for the following programs for a limited time: Data Analytics, Project Management, UX Design, IT Support, IT Automation with Python and Digital Marketing & E-Commerce.
