Lodging - U.S. RevPAR +10.9% y/y last week; Quadruple tailwinds drove very strong results

Overall, U.S. RevPAR was +10.9% y/y for the week ending 7/4/2026, per STR/ CoStar, above the prior week's result of +9.6% y/y and the 10-week average of +6.4% y/y.

Last week's outsized results were driven by quadruple tailwinds. *1) World Cup markets remain a bright spot for RevPAR growth (+9-39%) in the tournament's fourth week, 2) America250 celebrations a tailwind to demand, 3) The 4th of July holiday shift from Friday in 2025 to Saturday this year opened up mid-week Business and Group travel (Group RevPAR +29%), and 4) The shift also helped Saturday RevPAR, up 19.6% y/y.*

Similar to the data from the past few weeks, last week again experienced massive bifurcation across chain scales and the World Cup continues to be the rising tide to lift all boats, driving y/y RevPAR growth across all chain scales. The delta between the RevPAR growth in the Luxury chain scale and Economy stretched further to ~2180bps from ~1700bps in the prior week. Group RevPAR (+29.0% y/y) outperformed the Transient segment by ~1540bps, which is of no surprise, as weeks with a holiday shift typically see outsized Group RevPAR results.

Major RevPAR statistics presented below:

- Luxury RevPAR: +24.5% y/y
- Upper Upscale RevPAR: +13.6% y/y
- Upscale RevPAR: +12.2% y/y
- Upper Midscale RevPAR: +7.9% y/y
- Midscale RevPAR: +5.1% y/y
- Economy RevPAR: +2.7% y/y
- Independent hotels (~ 1/3rd of the data set) RevPAR: +9.1% y/y; and
- Within Upper Upscale & Luxury class hotels:
  - Group: +29.0% y/y vs. +10.2% in the prior week
  - Transient: +13.6% y/y vs. +14.6% prior week
- Las Vegas RevPAR: +1.1% y/y
  - **As a caveat, we note that many large Strip casino hotel operators do not participate in STR's survey.**

<u>Last week's RevPAR details and sequential trends (all comparable information on new STR methodology):</u>

- **Headline RevPAR** was +10.9% y/y vs. the running 28-day average of +9.3% y/y.
- **Occupancy:** Absolute occupancy was 63.5% vs. 69.2% for the running 28-day average.
- **Absolute Group occupancy:** 12.9% last week vs. 19.9% for the running 28 days.

Truist Securities Rating System for Equity Securities

Truist Securities, Inc. ("Truist Securities") rates individual equities using a three-tiered system. Each stock is rated relative to the broader market (generally the S&P 500) over the next 12-18 months (unless otherwise indicated).

Buy (B) – the stock's total return is expected to outperform the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Hold (H) – the stock's total return is expected to perform in line with the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Sell (S) – the stock's total return is expected to underperform the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Not Rated (NR) – Truist Securities does not have an investment rating or opinion on the stock

Coverage Suspended (CS) – indicates that Truist Securities' rating and/or target price have been temporarily suspended due to applicable regulations and/or Truist Securities Management discretion. The previously published rating and target price should not be relied upon.

Truist Securities analysts have a price target on the stocks that they cover, unless otherwise indicated. The price target represents that analyst's expectation of where the stock will trade in the next 12-18 months (unless otherwise indicated). If an analyst believes that there are insufficient valuation drivers and/or investment catalysts to derive a positive or negative investment view, they may elect with the approval of Truist Securities Research Management not to assign a target price; likewise certain stocks that trade under $5 may exhibit volatility whereby assigning a price target would be unhelpful to making an investment decision. As such, with Research Management's approval, an analyst may refrain from assigning a target to a sub-$5 stock.
