INCIDENT FACTS

Incident Start Date: 7/13/2021		Incident Start Time: 5:15 p.m.	
Incident Type: Vegetation		Cause: Under Investigation	
Incident Location: Feather River Canyon near Cresta Powerhouse			
Size: 142,940 acres	Containment: 18%	Expected Full Containment: Unknown	
Civilian Injuries/Fatalities: 0		Firefighter Injuries/Fatalities: 0	
Structures Threatened: 1,510	Structures Destroyed: 8	Structures Damaged: 0	

CURRENT SITUATION

Incident Update

Dixie Fire West Zone: The Dixie Fire remained active overnight with active surface fire and multiple tree torching with long range spotting and rollout. The fire is going to continue to move North and Northeast with the potential for 2-3 miles of new growth. The fire is burning in a remote area with limited access, extended travel times and steep terrain which hampers control efforts. Fire will continue to rapidly expand causing a need for the critical resources to control the fires spread.

Dixie Fire East Zone: Yesterday crews made good progress along the southeast edge of the Dixie Fire toward Bucks Lake. Today, if conditions are favorable a firing operation is planned to tie the existing fireline into the west shoreline. The intent of this operation is to keep the fire north of Bucks Lake. Firefighters will also address the Fly Fire, a new start just north of Keddie. The Fly Fire ignited yesterday evening in Butterfly Valley and burned quickly to the northeast across Hwy 89/70, growing to well over 1,650 acres. The cause is under investigation. The extreme fire behavior and long range spotting of both fires prompted several additional evacuation orders and warnings. The fires are expected to continue moving to the northeast today. Fire behavior is expected to remain extreme.
