

# ADDITIONAL QUALIFICATIONS with OISE CONTINUING AND PROFESSIONAL LEARNING

## ENVIRONMENTAL EDUCATION

Environmental education is central to teaching and learning in the 21st century; climate change, resource depletion, and environmental degradation are all pressing contemporary societal issues that require an educational response.

**Part 1** provides an engaging introduction to teaching and learning in environmental education for both elementary and secondary teachers. [Learn More](#)

**Part 2** explore the connections between system-thinking, ecojustice, and eco-identity in relation to environmental education. [Learn More](#)

**Part 3** uses collaborative inquiry to study and critically analyze the theory and practice of environmental education. [Learn More](#)
