

GSC 200 & 675M Series Mobile Electronic Message Center and SneezeGuards

The State of Indiana is offering COVID Awareness Grants to help encourage members of our communities to follow the ordinances so that we can limit the spread of COVID. With many businesses trying to remain open, having the proper equipment to help keep customers safe and informed is extremely important. Green Sign Company has a few products available to help our communities combat against COVID-19. GSC 675M Series is our new Portable Emergency Messaging Center. These Electronic Mobile Messaging Centers would be great to put in front of community buildings, health department buildings, airports, and even hospitals to help spread awareness about COVID-19. They can be used to inform citizens of Testing Sites and their hours, and give Covid-19 health tips. With the ability to get information changed on the sign in real-time, this is a perfect way to keep everyone informed quickly and efficiently. Green Sign Company also offers GreenGuard SneezeGuards! These are great for city buildings or health department buildings that might do frequent face to face contact. Adding another level of safety when working with others is a great way to reduce the spread of COVID-19.
