

Umbrella Craft

Supplies:

- Paper plate
- Blue paper
- Markers
- Pencil
- Blue twine or thread
- Scissors
- Hot glue gun

Instructions:

1. Start by drawing a line down the center of your paper and cutting it in half. Set one half aside (this will be your umbrella top).
2. Draw a large, wide letter "J" shape on the other half. Cut it out. Now you have your umbrella top and handle.
3. Make sure the rounded side of the plate is facing you. Use the markers, or anything else you want to decorate with, and decorate the umbrella top and handle. Be creative! You can color, paint, use tissue paper, etc.
4. Now fold the blue paper a few times, and draw some raindrop shapes on it. Then cut them out. Folding the paper first allows you to be able to create multiple raindrops at a time.
5. Grab the blue twine, or whatever string you have available. Cut a few pieces of varying lengths (these will be used to tie the raindrops to the umbrella).
6. Place the blue twine on top of a raindrop, place some hot glue on it, and sandwich another raindrop on top. Do this a few times on each piece of twine, making sure to leave at least an inch at the top empty.
7. Next, flip your umbrella top over and glue the raindrop twine and the handle to the umbrella top. You're all done, enjoy!
