

DIY Snow Globe

Supplies:

- Paper plates in the style/size of your choice
- Clear plastic plates (sized smaller than your paper plates)
- Confetti
- Paper cutouts, embellishments, stickers, markers, photos, etc. (whatever you want to place inside your globe)
- Hot glue or Mod Podge
- Pretty paper (for snow globe base)

Instructions:

1. Start by decorating your paper plate any way you'd like. Example: a wintry wonderland, your child's photo so that they are inside the snow globe, draw, paint, color, add stickers, let your imagination lead the way.
2. If you glued anything to the paper plate, wait for it to dry. After it's done drying, add confetti! You don't need a lot, just enough to fill the bottom of the snow globe so you can still see your background.
3. Add glue along the outside edge of your clear plate. Press the clear plate face down over your paper plate.
4. For the base, just cut an oblong shape to your desired size and glue it on the back of the plate. Wait for it to dry and you're done!
