

Paper Plate Dinosaur

Supplies:

- Paper plates
- Paint
- Clothespins
- Colored paper, cardstock is preferred\
- Googly eyes
- Glue

Instructions:

1. Start by cutting your paper plate in half.
2. Decide what color body you want your dinosaur to have and paint one of the ½ plate pieces. Paint two corresponding clothespins for each dinosaur you want to make.
3. Once your dino body is dry, use it as a template for drawing your dinosaur spikes, head, and tail. You decide if you want a long neck, short neck, small tail, or long tail. This is where the kids can get really creative!
4. Glue your head, tail, and spikes to the back side of the paper plate. Elmers glue works great but if you have kids that are a little impatient, parents can use a hot glue gun for sturdier and faster dino making.
5. Add a little smile and googly eye to your dino head.
6. Attach clothespins and you are done.
